

Report of Sneha Jyothi Vidyalaya 2011

Dear Fr. Provincial and definatory with profound gratitude to the provincial definatory I am here to present brief report of the happenings of the Sneha Jyothi Vidyalaya. This scholastic year 2011-12 has been a great and wonderful opportunity for the students to bloom out in various aspects of life.

Education is the right of every student and this right has been made possible to every student. Not only education in quantity but qualitative quantity is provided to the students. This has been possible with the acquiring of the new skilled teachers in the training the students. Students are given many privileges and opportunities to bloom out in their variety of talents. The school has also given importance for extra co-curricular activities which enhances the joy of students in up building the variety of talents.

English as the medium of instruction has brought a drastic change in the dealings of the student. More importance is given to spoken English among the students. Joy fills my heart to see the progress of our school. Students at initial stages are even guided to deliver sample speeches in English.

During these three months the students have brought many laurels to school in the sports field. For the first time in the history of Sneha Jyothi School the students participated in different sports events in the zonal, taluka, district and state levels.

The school took active participation in the organized by the sports committee and won volleyball, girls throw ball and the individual event high jump respectively. We trained these students to participate in the taluk level. The volleyball bagged second prize in the taluk level and first prize in the high jump and second prize in 200 meters. The school was represented even at the district level. The students themselves expressed that they would perform better in the future. These competitions also brought great confidence in the participants. The children also given the opportunity in participating in the drawing competition which was held at the state level. There was a lot of enthusiasm in the students while participating in all these events. The parents have encouraged their children to participate in various events.

A gradual new face lift up was given to the volleyball, kokko, high jump, kabaddi grounds. Ample opportunities are made accessible to students to grow physically as well as mentally.

"Today's wastage is the tomorrow's shortage" keeping this thought in mind the school celebrated vanamahostava. Children were enlightened on the need for afforestation in this modern time. The children take special interest to water the plants daily. Planting and taking care of plants in these areas where there is scarcity of rainfall is very much appreciated on the part of students.

With a view of enhancing the quality of learning among the incapable students special attention is given to improve their learning abilities in the form of extra coaching classes so as to uphold the dignity of every student. fun recreation among the students improves the quality of being united in one

mind and heart. Singing, drawing and other activities are done to improve the talents of the students. In regarding the Christian faith the students of our school are being thought catechism each Sunday after the holy Eucharist.

Success is a journey, not a destination and failures are the stepping stones to success. Though there have been many defects and black spot on the façade of the administration of the school gradually a sign of organized and systematic functioning's visible. Every parent has a word of appreciation about the progress in their children. Our school is well appreciated and we are indeed privileged to seek this opportunity and make tremendous progress in keeping a high stand for our school. And this is possible only because of the sincere efforts of every staff of the school.

As a good sign development of our school and in its entirety, we have planned to start 8th standard in our school premise. By November 1st all the necessary documents will be submitted to the administrative office of Gulbarga. We hope and pray that this also would take place in reality.

Long pending work of Provident Fund, was done through the help of Fr.Jerald Lobo and hard work of Sr. Irene Martis, and was completed successfully. The registration of new school bus was also completed.

Last but not the least on behalf of the entire staff I would like to thank the Provincial and definitory for all your support and encouragement to carry out my ministry fruitfully.

Principal

Fr.Sathish Fernandes
